ABOUT ME

I'm a Junior front-end developer searching for a fresh opportunity at an exciting company. My main focus is creating user-friendly HTML, applying modern CSS techniques, and writing neat JavaScript code. I primarily work with React, but I'm flexible to adapt to any other required tools.

PROJECTS:

- **Twitter clone** - This project is a twitter clone built using HTML and vanilla CSS.

Link to the project : <https://quiet-lily-5c5c9e.netlify.app>

- **Portfolio Website** - Built a personal portfolio website from scratch, using HTML and CSS with little JavaScript

Link to the project : <https://heartfelt-cobbler-e898fd.netlify.app/>

- **Holidaze (REACT project)** - Holidaze is a project that was build like Airbnb clone showing how the customer-facing side of the website where users can book holidays at a venue, and an admin-facing side of the website where users can register and manage venues and bookings at those venues.
